

## Detailed situation for the Bärenhütte and Turracher Berghütte

The location of the Baerenhutte and the Turracher Berghutte is sometimes difficult to find. The easiest way is to use well-known navigation apps: for example Google Maps and WAZE. These have been tested by us and work excellently. For guests who want to reach the huts in a different way, we have a route description with photos and text. Sometimes, it is hard to find the houses in the dark, because there is almost no lighting in winter time and there can sometimes be a lot of snow. In case of problems, please call our Hostess Heike or our concierge Ali. Their telephone numbers will be communicated in the confirmation.

The house numbers are **not** consecutive as in the Netherlands. The numbering is based on the last house to be built gets the highest number over the entire Turracherhöhe and Turrach village!
